

Temperature Questionnaire

Patient:

Gender:

DOB:

Instructions:

Estimate how frequently the behavior has occurred since it was first observed. Select a number using the following key to represent frequency of occurrence.

Never or hardly ever	Sometimes	Often	Very often or almost constantly
1	2	3	4
<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

	Frequency			
	1	2	3	4
Complains of feeling hot in the late afternoon and evening despite a neutral ambient temperature	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Walks outside in cold temperatures with very light clothing (short sleeves, shorts) and seems not to feel the cold	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Overheats easily (complains of feeling too hot, sweats profusely) with mild to moderate exertion	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Overheats in response to real or perceived stressors	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Sweats excessively before or during sleep	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Face easily becomes flushed or tips of ears redden	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Complains of being cold in the early morning	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Becomes moody (irritable/angry) with abrupt increases in temperature/humidity (including entering a warm house from a cold outdoor temperature)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Becomes activated with increased energy and activity level in the late afternoon	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
